

New Mobile Federal Courthouse and John Campbell Courthouse Renovation

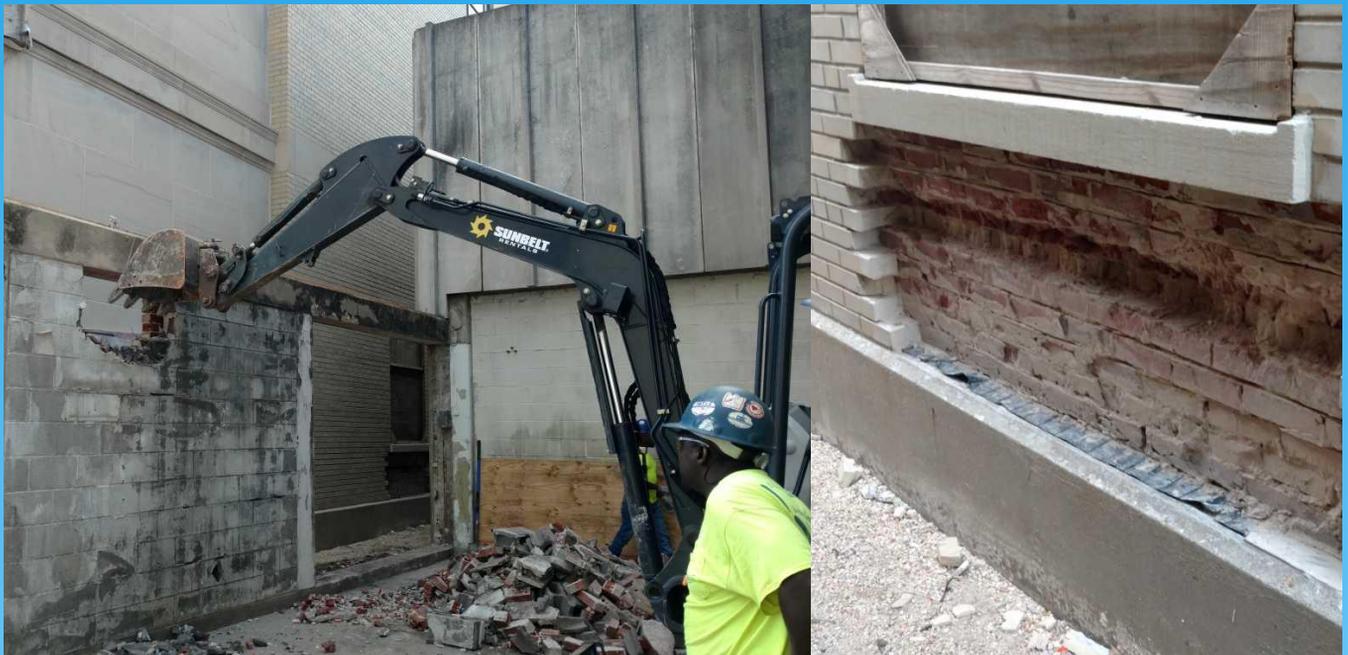

Town Hall Bulletin

Issue No. 41

July 2019

A NEW WAY TO WORK

Tearing down a wall between Campbell and the garage (L), removing brick under window (R)

EMPLOYEES coming to work at the renovated Campbell building will have a new entrance on level 1 where they will be screened. Demolition to enlarge a window into a doorway and to knock down a wall at the northeast corner of the building occurred in July. This was followed by the creation of footings for new ramps and building of a new ground floor passageway in the garage. Previously employees crossed into Campbell through a sky bridge from the garage on level 2. This work was added as a betterment.

OTHER WORK: Construction continued on the new handicapped ramps at the main entrance on St. Joseph Street. A crane-lifted the new generator into place on the courtyard roof. Work continued on casework installation and ceiling work on the upper floors inside the building. Drywall finishing and bathroom tile work in the middle floors. Drywall installation and MEP rough-in on the lower floors.
